Professional Summary

Cybersecurity-focused Computer Science Engineering student experienced in penetration testing, digital forensics, offensive security tooling, and full-stack development.

Education

Muthoot Institute of Technology & Science (MITS) <i>B.Tech in Computer Science & Engineering — Cybersecurity</i>	Kochi, Kerala 2024 – 2028
--	------------------------------

Experience

Junior Tech Lead <i>MCSC — MITS Cyber Security Club</i> - Led workshops, CTF competitions, and cybersecurity training programs. - Mentored students in penetration testing and Linux exploitation. - Developed offensive security tools and collaborative research initiatives.	2026 – Present
Main Developer & Maintainer <i>Taqwa Fashion Store (Freelance)</i> - Managed development and maintenance of the official e-commerce platform. - Handled deployment, optimization, updates, and production stability.	2026 – Present
Cybercrime Investigation Intern <i>Kerala Police (Cyber Crime Police Station)</i> - Worked on phishing, fraud, and unauthorized access investigations. - Performed digital forensics and evidence analysis workflows.	Dec 2025 – Jan 2026

Technical Projects

Strimo — Streaming Aggregator Built scalable streaming aggregation platform with scraping pipelines and optimized indexing.	GitHub
GDrive Timestamp Updater — Python Automation Developed automation tool for Google Drive metadata and timestamp management.	GitHub
RootMe CTF Platform — Offensive Security Lab Developed multi-category CTF platform with dynamic challenge hosting and exploitation paths.	GitHub
SDR Monitoring Station — RTL-SDR, GNU Radio Built RF monitoring system for VHF/UHF signal decoding and analysis.	GitHub
MITS PRINT — Web App Developed campus-wide printing system used by students and faculty.	GitHub

Technical Skills

Cybersecurity: Penetration Testing, Digital Forensics, Malware Analysis, Threat Intelligence, Web Application Security, Vulnerability Assessment

Programming: Python, C, JavaScript, Bash, SQL

Frameworks & Development: React, Node.js, REST APIs, Full-Stack Web Development

Security Tools: Nmap, Wireshark, Metasploit, Burp Suite, Scapy, Linux Tooling

Infrastructure & Systems: Linux, Docker, Git, TCP/IP, DNS, HTTP, Networking Fundamentals

Achievements & Activities

World Rank 8 — HTB Try Out CTF Achieved global Rank 8 with team Obi-LAN in Hack The Box Try Out CTF 2026.	2026
Winner — AI Hackathon (ACM MITS) Built CRaaS, a clean-room software recreation SaaS platform.	2026
3rd Place — TECHLETICS 4.0 CTF Solved web exploitation, forensics, and privilege escalation challenges.	2025
Open Source Contributor Maintained 40+ repositories and contributed to security tooling projects.	2022 – Present
